Technical Skills

- Languages: JavaScript (ES6+), TypeScript
- Library: React.js, React Router DOM, React Hook Form, YupResolver.
- State Management: Context API, useReducer.
- Backend/DB: Firebase, Firestore, Firebase Authentication.
- Styling: Tailwind CSS, CSS3, HTML5.
- Tools: Git, GitHub, Vite, npm.
- Concepts: Responsive Design, Component Architecture, Form Validation

Projects

- **Marcedo – E-Commerce Website:** marcedo-application.netlify.app
A fully responsive e-commerce platform with 10+ pages including dynamic product filtering/sorting, cart, wishlist, checkout flow, and Firebase Authentication. Designed and implemented a scalable Firestore data architecture (products, variants, pricing, media, reviews) and an admin dashboard with pagination and filtering.
Tech Stack: React 19, Firebase/Firestore, Tailwind CSS, Framer Motion, React Router DOM, React Hook Form.
- **Educora – CMS Educational Platform:** educora-cms-frontend-platform.netlify.app
scalable LMS frontend platform with course listing, filtering, pagination, and a fully structured landing page built with production-like architecture.
Tech Stack: React 19, TypeScript, Vite, Tailwind CSS, React Hook Form
- **StaffM – Employee Management Dashboard:** staffm-dashboard.netlify.app
A complete HR dashboard with CRUD operations, employee statistics, interactive charts, and client-side data persistence — built without any framework.
Tech Stack: HTML5, CSS3, JavaScript (ES6+), Chart.js, LocalStorage API.

Frontend Developer

Projects

- **Products** Dashboard: simple-products-dashboard.netlify.app/
Product management dashboard featuring add, edit, delete, search, filtering, and pagination — built as a deep dive into React Class Components and lifecycle methods.
Tech Stack: React (Class Components), Context API, LocalStorage, React-Toastify.

Education

Faculty of Specific Education, Menoufia University
Department of Educational Technology — Computer Teacher Program
Menoufia, Egypt | Expected Graduation: 2026
